CAREER OBJECTIVES

Highly motivated Computer Engineering student seeking an entry-level position to apply technical knowledge and problem-solving skills while contributing to organizational growth.

EDUCATION

Bachelor of Science in Computer Engineering 2023-Present
Lyceum of the Philippines University – Cavite

Science, Technology, Engineering, and Mathematics (STEM) 2021-2023
Rogationist College – Silang, Cavite

AWARDS / ACHIEVEMENTS

- **Dean's Lister (GPA: 1.48)** – Lyceum of the Philippines University – Cavite, 2024
- **With Honors** – Senior High School, Rogationist College, 2021-2022

SKILLS

- **Frontend Development:** HTML, CSS, Javascript (Responsive Web Design, UI Development)
- **Programming & Tools:** C#, C, Python, Visual Studio 2021, PyCharm, Git, Github
- **Database:** MySQL, SQL Server
- **Office & Design:** Word, Excel, Google Docs, Google Sheets, Canva, Photoshop
- **Other Skills:** Time Management, Problem Solving, Critical Thinking

PROJECTS

POS and Payroll System Desktop Application (C#, SQL Server, Visual Studio 2022)

- GUI-based Windows Forms application with login system and user roles (admin, cashier, POS staff).
- Manage employees, payroll, user accounts, and sales transactions.
- Generate real-time reports: sales, payroll, employee, and user account reports.
- Uses SQL Server for data storage and retrieval, ensuring persistent database management.
- Modular MDI design allowing multiple forms to open simultaneously for easy navigation.

Barangay Healthcare Management System (C#, Windows Forms, SQLite, Visual Studio 2022)

- Developed a desktop healthcare management application for barangay health centers using C# Windows Forms.
- Implemented authentication, user account management, patient registration, consultation records, medicine inventory, and event scheduling modules.
- Designed an interactive calendar system with event creation, editing, deletion, and dashboard integration.
- Utilized SQLite database for secure and persistent storage of healthcare records and system data.
- Applied CRUD operations, database connectivity, and modular MDI architecture for efficient navigation and maintenance.
- Generated organized healthcare records and management tools to improve data accessibility and administrative efficiency.

RELEVANT COURSEWORK

- Programming Logic and Design
- Database Management
- Object Oriented Programming
- Data Structures and Algorithms
- Software Design
- Computer Fundamentals and Programming
